Projects

- **EatNow -Food Order & Delivery System (PERN Stack)** – [Live Site](#)
Developed a responsive food delivery platform where users can browse restaurants, place orders, track delivery partners live on a map, and receive real-time order notifications. Users can apply to become delivery partners or restaurant partners, while restaurant partners can add and manage their menu items through intuitive dashboards.
 - **Travel Agency Platform (Next.js)** – [Live Site](#)
Developed a fast, responsive frontend for destination exploration, country filtering, tour selection, and booking. Ensured excellent UX across mobile, tablet, and desktop.
 - **Doctor Booking System (MERN Stack)** – [Live Site](#)
Built a responsive doctor appointment platform with role-based authentication for Patients, Doctors, and Admins. Patients can search doctors by specialty, location, or availability, view profiles, check real-time slots, book appointments, and receive notifications. Doctors manage schedules, accept/reject bookings, and update availability; Admins approve doctors and oversee the system.
